

coupled with each other through a conductive material penetrating a layer provided therebetween.

7. (Amended) An electronic apparatus, comprising an organic EL device, the organic EL device further comprising:

at least a first electrode layer;

a light-emitting layer;

a second electrode layer in that order above a substrate;

a first terminal connected to the first electrode layer and a second terminal

91  
Coro corresponding to the second electrode layer, which are formed above a same surface of the substrate as that above which the first electrode layer is provided;

wherein the second terminal and the second electrode layer are electrically coupled with each other through a conductive material penetrating a layer provided therebetween.

#### REMARKS

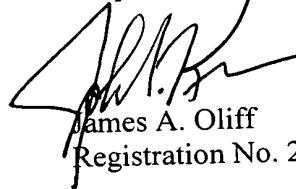

Claims 1-7 are pending in this application. By this Preliminary Amendment, the Abstract, specification and claims 1-7 are amended. No new matter is added.

The attached Appendix includes marked-up copies of the substitute specification (37 C.F.R. §1.125(b)(2)) and claims (37 C.F.R. §1.121(c)(1)(ii)).
